JIDE OGUNBANJO

AUSTIN, UNITED STATES | 5128250309 | JIDEOGUN93@GMAIL.COM

PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience developing scalable web applications and enterprise solutions. Skilled in JavaScript, Node.js, TypeScript, and containerization with Docker and Kubernetes to build and deploy microservice architectures. Proven expertise in applying ORM techniques and agile methodologies to drive continuous improvement and deliver secure cloud-native products. Dedicated to innovation and consistent delivery of high-quality features that exceed client expectations.

SKILLS

- **Programming Languages**: JavaScript ES6, Java, C#, TypeScript
- **Frameworks & Libraries**: React, Redux, Node.js, Express.js, Next.js, React-Hooks, jQuery, Apollo, Jest
- **Web Technologies**: HTML5, CSS3, GraphQL, JSP, XML, JSON, Webhooks, TailWind CSS, Stripe, ShadCN
- **Databases**: MongoDB, MySQL, Oracle, PostgreSQL, Firebase
- **DevOps & Tools**: Docker, Git, Github, Jenkins, CI/CD, Kubernetes, Continuous Delivery
- **Cloud & Platforms**: AWS S3, Cloudinary, Cloud Technologies
- **Development Practices**: REST APIs, Object Relational Mapping, Microservice Architectures, Backend Application Development, API-driven Architecture
- **Methodologies & Certifications**: Agile Methodology, Agile Scrum Certifications
- **Professional Development**: Learning New Technologies, Copilot, ChatGPT

EMPLOYMENT HISTORY

CACI Inc **Jul 2021 - Dec 2024**
FRONT-END DEVELOPER *Austin*

- Developed responsive UI components with React.js, enhancing code modularity and reusability to support cloud-based web applications.
- Collaborated in Agile teams using Jira to accurately estimate story points, debug issues, and plan sprints, ensuring timely delivery.
- Optimized user experience through performance enhancements that reduced load times and increased engagement.
- Refined UI designs based on user feedback, significantly boosting customer satisfaction and retention.
- Integrated APIs collaboratively with back-end developers, aligning front-end implementations with evolving microservice architectures.

Texas Education Agency **Jun 2019 - Jul 2021**
FULL STACK DEVELOPER

- Developed Java/C# applications on JBoss/ASP.NET, enhancing load times and user satisfaction through efficient code deployment.
- Optimized Oracle and DB2 procedures by refining queries to accelerate data retrieval and improve system performance.
- Built responsive UIs using JavaScript and JavaServer Pages, ensuring seamless navigation and accessibility for end users.
- Collaborated with cross-functional teams using Git and Agile methodologies to deliver software solutions aligned with modern microservice architectures and containerization practices.

Trilogy Education **May 2019 - Jan 2021**
PART-TIME TEACHING ASSISTANT *Remote*

- Mentored students in coding best practices, bolstering project success and enhancing technical proficiency.
- Provided constructive feedback via Zoom and Slack to elevate student confidence and coding abilities.
- Assessed student progress through personalized feedback, enabling tailored learning paths.
- Fostered a collaborative learning environment using tools like Slack and Zoom, inspiring a passion for new technology adoption.

DAC **Jul 2018 - Dec 2019**
CONTROLS ENGINEER *Leander, TX*

- Designed and commissioned robotic and electro-mechanical systems using PLCs (Allen Bradley, Siemens) and HMI programming (Factory Talk, Redlion).
- Analyzed system performance data to identify optimization opportunities, reducing downtime and improving operational reliability.
- Coordinated with cross-functional teams to streamline project timelines and ensure successful delivery of automation solutions.

Symbotic LLC **May 2017 - Jun 2018**
AUTOMATION ENGINEER *Chicago, IL*

- Integrated automation systems at client sites, achieving measurable improvements in efficiency and reducing operational delays.
- Configured PLCs and robotic systems to enhance material handling processes and streamline workflow.
- Developed user-friendly HMIs for real-time data access, empowering operators to make informed decisions and improve overall productivity.

EDUCATION

The University of Texas at Austin **Oct 2018 - Apr 2019**
CERTIFICATE, FULL STACK WEB DEVELOPMENT

The University of Texas At San Antonio **Jan 2013 - May 2017**
B.S., MECHANICAL ENGINEERING

ADDITIONAL INFORMATION

Jide's React SPA Portfolio | https://jideogun.github.io/Jide-Portfolio/
- A responsive single-page portfolio built with HTML, CSS, and JavaScript to showcase development projects and contact information.
- Designed with clean UI and smooth navigation for a seamless user experience.

Pro DJ | https://www.bookprodj.com/ | https://www.bookprodj.com/
- Multi-DJ booking platforms that connects clients to DJ's and helps DJ's showcase their media content

Work Day Scheduler | https://jideogun.github.io/work-day-scheduler/
- A daily planner app built with jQuery and Moment.js.
- Allows users to input tasks into time-blocks and saves data using local storage.
- Features real-time color-coded scheduling for better task visibility.

Food Festival | https://jideogun.github.io/food-festival/
- An event landing page showcasing performance optimization techniques such as lazy loading and PWA enhancements.
- Built with HTML, CSS, and JavaScript to demonstrate mobile-first, accessible design principles.

MM | https://jideogun.github.io/MusicAndMovies/
- Web app displaying latest music and movie releases using Spotify and theMovieDB APIs.
- Users can preview albums and trailers, with data stored via localStorage.

Weather-Dashboard | https://jideogun.github.io/weather-dashboard/
- Web app that uses the OpenWeather API to display current weather and 5-day forecasts for searched cities.
- Includes temperature, humidity, wind speed, and UV index.
